

Guide to painting simple Camo patterns

Many camouflage patterns have been used during the conflicts in Russia & the Northern Caucasus over the last 40 years. In this guide you will find 6 of the more common analogue colour schemes, with easy to follow steps to help you to paint your 28mm miniatures to a reasonable table-top standard.

Please note: In all cases the intention is to create a passable impression of the scheme at arms length, and as such they neither replicate the true colours or patterns of the camouflage itself. Have fun, and when you are done remember to post pictures of your painted minis on our Facebook page.

~ Tiny Terrain Models

Base Coating

To achieve results like those shown in this paint guide, the first step required will be to undecoat all models with a Mid Grey, spray can Primer.

The following pages in the guide will give you the step by step stages to build up the following camouflage patterns:

- * **Generic Winter**
- * **Russian KZS Sunray**
- * **Blue Tiger Stripe**
- * **Flecktarn**
- * **DPM**
- * **Russian Flora**
